

— GlassPac

A protection packaging developed for the transport of glass bottles.

GlassPac

Molded fiber protective packaging developed for the transport of glass bottles mainly for hazardous goods. This packaging solution, consisting of top and bottom part, is approved by the UN. The molded fiber product is manufactured from 100 % recovered paper.

Additional function

- The good absorbency of the molded fiber product can be increased using Vermiculite. In the event of damage, the molded fiber product is able to absorb the liquid
- Versions are available for various bottle types and screw caps

Benefits

- Cushions have been approved in several UN Hazardous Goods classes
- The molded fiber products can be stacked inside each other to save space – small storage and freight volume
- The cushions have been developed for manual and completely automated packing
- Manufactured from 100 % recovered paper, the molded fiber products can be completely recycled

Product overview

Product no.	Product name	Dimensions mm	Piece / pallet	CP2 pallet height mm
1833017_1833018	6 x 0.5 l	308 x 193	1,120	2,000
1833015_1833016	1 x 1.0 l	135 x 135	2,220	1,300
1833019_1833020	6 x 1.0 l	385 x 285	480	2,100
1833013	1 x 2.5 l	185 x 185	960	on request
5263004_5263005	4 x 2.5 l	364 x 364	300	2,100

Top and bottom part are usually always shipped separated from each other.

It goes without saying that we also develop individual solutions for special requirements.

Prices are available on request.
